

# Global Laboratory Services. Discover. Experience.

Eurofins Medinet founded its facility in Singapore in 2007 to provide clients with geographic proximity for the central laboratory testing of specimens obtained from clinical trials being conducted in the Asia-Pacific region. Establishment of this facility ensures a closer management of transportation, maintenance of specimen integrity, and an overall more efficient turn around time of data.

Eurofins Medinet Singapore is managed by Dr. Stanley Tam who's track record of establishing and managing Central Laboratories in East Asia has helped ensuring that Eurofins Medinet can offer the most appropriate and highest quality services available in the region.

## **Eurofins Medinet Singapore**
