

# Global Laboratory Services. Discover. Experience.

The Eurofins Medinet bioanalytical laboratory in Fitzsimons Biotech Park in Aurora, Colorado extends the Eurofins Medinet network of central laboratories in Europe, Asia and the United States to provide innovative mass spectrometry based services for the pharmaceutical clinical trial and drug development sector.

## **Eurofins Medinet Denver provides innovative mass spectrometry-based services:**

- Development and validation of analytical assays for drugs and metabolites
- Bioanalysis for pre-clinical and clinical studies
- Drug metabolism and drug distribution
- Pharmacokinetics and toxicokinetics
- Integrated biomarker services: discovery, development and analysis of biomarkers in clinical trial programs
- Quantification of endogenous compounds (such as isoprostanes and steroid hormones)
- Proteomics and metabolic profiling (metabolomics)
- Consulting, study planning and strategy development

Complementing the European bioanalytical laboratory in Breda, The Netherlands, the Denver laboratory is strategically located in the Fitzsimons Biotech Park next to the new University of Colorado Health Sciences Center Fitzsimons campus and has strong collaborative links with university researchers. Eurofins Medinet Denver is led by Professor Uwe Christians, who is supported by a dedicated team that has a long and successful track record in these fields.

Eurofins Medinet is committed to providing the highest quality services, accurate, timely results and expert advice from our highly qualified team of experienced scientists. Data integrity is of paramount importance and, by continually monitoring both data quality and our laboratory operations, we can ensure that the highest standards are maintained. Our Denver laboratory is fully compliant with the OECD Principles of Good Laboratory Practice (OECD GLP).

Over the last 20 years Eurofins Medinet has been serving the pharmaceutical industry with a full central laboratory package. Eurofins Medinet provides comprehensive analysis in genomic testing, microbiology testing to support clinical trials and highly specialized bioanalytical services. We offer a wealth of experience and scientific accomplishment to fulfill our customers' analytical needs throughout every phase of drug development.

Breda - Paris - Washington DC - Denver - Singapore - China
