

Microbiology to Support Clinical Trials

Global Laboratory Services. Discover. Experience.

Building on 20 years of experience, Eurofins Medinet offers the synergy of integrating a full spectrum of global laboratory services to support pharmaceutical drug development. Eurofins Medinet offers a full range of safety parameters and biomarkers, genomic testing, microbiology testing and highly specialized bioanalytical services. We offer a wealth of experience and scientific accomplishment to fulfill our customer's analytical needs throughout every phase of drug development.

Reasons to choose Eurofins Medinet Anti-Infective Services

- Dedicated, full service microbiology laboratory
- Cutting-edge technology and adherence to the strictest national and international quality standards, e.g. CLSI (NCCLS), CLIA, CAP, EUCAST
- Expert mycology and bacteriology testing
- Specialized testing for key resistance phenotypes, e.g. MRSA, VRE, ESBLs
- Globally recognized capabilities to support clinical trials for all indications, e.g. CAP, HAP, IA, cSSTI
- Services are global in scope
- Commitment to quality, integrity, teamwork, and customer service
- Extensive anti-infective expertise allows us to provide informed and relevant scientific perspective

Fully supported by other key global services

- Safety laboratory testing, e.g. chemistry, hematology, UA
- Other specialty laboratory testing, e.g. biomarkers
- Project and data management
- Logistics and courier management services
- Quality assurance
- Regulatory compliance
- Global standard operating procedures

This comprehensive array of capabilities allows us to provide you with flexible, global, and cost-effective services that assure the production of accurate, reliable, and timely results that meet your development needs.
