

Eurofins goes fully operational with new Central Laboratory in Singapore

Brussels/ Nantes, May 4, 2007

Eurofins announce today that their recently established Central Laboratory in Singapore is now fully operational and, operating under the Eurofins | Medinet brand, extends its network of central laboratories in Europe and the US into Asia to provide safety testing for our customers in the pharmaceutical clinical trial and drug development sector.

Eurofins commenced the construction of the facility in November 2006 and obtained its operational license from the Singapore Ministry of Health in early 2007. Located in the Synergy Building of the International Business Park, the laboratory contains state-of-the art equipment and was developed rapidly in response to strong customer interest. In this way Eurofins will continue to provide market-leading services in this fast-growing segment, supporting both our big pharmaceutical clients and the needs of smaller niche players and biotechnology companies.

“Our clients demand global analytical and testing capabilities that meet their objectives throughout all phases of drug development,” said Dr. Arnold Verbeek, CEO at Eurofins | Medinet. “Establishing the Singapore laboratory strengthens our ability to meet our customer needs worldwide while offering greater value to our bottom line.”

Eurofins | Medinet provides specialized testing in microbiology, bioanalysis, genomics, pharmacokinetics, and biomarker development using its fully accredited central laboratories in the Netherlands, USA (two labs), France and now Singapore with additional standardised partner laboratories in South Africa, India, China, Japan, and Australia.

Notes for the editor:

Eurofins – a global leader in bio-analysis

Eurofins Scientific is a life sciences company operating internationally to provide a comprehensive range of analytical testing services to clients from a wide range of industries including the pharmaceutical, food and environmental sectors.

With over 5,000 staff in more than 70 laboratories across 24 countries, Eurofins offers a portfolio of over 15,000 reliable analytical methods for evaluating the authenticity, origin, safety, identity, composition and purity of biological substances and products. The Group is committed to providing its customers with high quality services, accurate results in time and expert advice by our highly qualified staff.

The Eurofins Group is one of the global market leaders in this field of applied life sciences. It intends to pursue its dynamic growth strategy and expand both its technology portfolio and its geographic reach. Through R&D, in-licensing and acquisitions, the Group draws on the latest developments in the field of biotechnology to offer its clients unique analytical solutions and the most comprehensive range of testing methods.
